 Patna, Bihar

🎯 Career Objective

Motivated and detail-oriented Computer Science graduate currently pursuing M.Tech in Cyber Security, with strong foundations in software development, networking, and system security. Passionate about cybersecurity, secure application development, and problem-solving. Seeking opportunities to apply technical skills in cybersecurity, software engineering, and system design while contributing to innovative and secure technology solutions.

🎓 Education

Government Engineering College, Vaishali M.Tech in Cyber Security	2025 – 2027
Bakhtiyarpur College of Engineering, Patna B.Tech in Computer Science CGPA: 8.01	2021 – 2024
Darbhanga Polytechnic College Diploma CGPA: 8.5	2018 – 2021

✂ Technical Skills

- **Languages:** Python, C++, Java, JavaScript, SQL, Latex
- **Web Technologies:** HTML, MongoDB, Git, Node.js, Next.js, Tailwind CSS, SCSS
- **Tools & Platforms:** VS Code, PyCharm, GitHub, Power BI, Linux CLI, TensorFlow
- **Concepts:** Data Structures & Algorithms, System Design, DBMS, OOP, Operating Systems, Computer network, Network Security
- **Other:** Prompt Engineering, MS Office Suite, Expert in AI uses

Conference Research Paper

AI, Computer Vision, Cyber Security

- Presented a research paper titled “*AI-Driven Camera Intelligence System for Real-Time Object Recognition, Tracking and Smart Automated Surveillance*” at the 2nd ISTE Bihar & Jharkhand Students’ Convention 2026.
- The paper focused on AI-based surveillance systems using real-time object detection and intelligent monitoring techniques for smart security applications.
- Demonstrated strong technical understanding, innovative thinking, and research capabilities in the domain of Artificial Intelligence and Smart Surveillance Systems.

Projects

Plant Disease Prediction System

Python, TensorFlow, Flask

- Developed an ML model achieving 90% accuracy in detecting plant diseases from images.
- Designed and deployed a user-friendly web interface using Flask.

College Management System Website

MERN Stack, Web Development

- Developed a full-featured college management website integrating academic management, hostel management, library management, notice board, and student dashboard functionalities.
- Designed responsive user interfaces and implemented secure backend services for efficient student and administrative operations.
- Built modules for attendance tracking, notices, student records, library resources, and hostel data management using modern web technologies.

Health Management System

Python, MySQL, Power BI

- Engineered a comprehensive tracker for diet and fitness metrics.
- Created interactive Power BI dashboards to visualize progress and insights.

School Database System

SQL, DBMS

- Designed and implemented a robust relational schema and ER model.
- Optimized CRUD operations and queries for efficient data management.

Diverse Python Projects

GUI, APIs, Games

- Built multiple mini-projects demonstrating proficiency in GUI development (Tkinter), API integration, automation, and game development.

Internships & Training

Salesforce Developer Intern

Dec 2023 – Jan 2024

Patna

- Contributed to the development of CRM modules and backend services within the Salesforce ecosystem.

North Bihar Power Distribution

Jan 2023 – Mar 2023

Patna

- Engineered backend logic for billing systems and managed database structures, enhancing operational efficiency.

100 Days of Code Bootcamp – Angela Yu (Udemy)

Online

- Completed an intensive Python bootcamp covering automation, web development, APIs, data analysis, and GUI applications.
- Built multiple hands-on projects to strengthen problem-solving and software development skills.

MERN Stack Development Training – Jonas Schmedtmann (Udemy)

Online

- Gained practical experience in full-stack web development using MongoDB, Express.js, React.js, and Node.js.
- Developed responsive web applications and learned REST APIs, authentication, and backend integration.

🌟 Certifications & Achievements

- Python Bootcamp – 100 Days of Code by Angela Yu (Udemy)
- MERN Stack Development Training – Jonas Schmedtmann (Udemy)
- Salesforce Developer Virtual Internship
- Java & SQL Certification – Coursera
- System Design Fundamentals – Udemy
- Microsoft AI Classroom Program – Microsoft
- NPTEL Network Security Course – Achieved Topper Performance
- 5-Star Rating in C++ & SQL – HackerRank
- Presented Research Paper at 2nd ISTE Bihar & Jharkhand Students' Convention 2026 on AI-Driven Smart Surveillance Systems

👥 Extracurricular & Leadership

Code Champ Club – Mentor

- Mentored and guided junior students in Data Structures & Algorithms (DSA) and competitive programming strategies.
- Conducted peer-learning workshops on foundational system design principles, fostering collaborative learning.

Teaching Assistant – GEC Vaishali

- Assisted in teaching and mentoring 3rd-year students in core Computer Science subjects and practical sessions.
- Supported students in problem-solving, programming concepts, and technical project guidance.

Final Year Project Mentor – CSE & IoT

- Guided final-year students in project development, documentation, research methodology, and implementation strategies.
- Provided mentorship in software development, IoT-based applications, and presentation preparation.

Research Assistant – Prof. Pankaj Kumar

- Assisted in academic research activities, technical documentation, and analysis related to Computer Science and Cyber Security domains.
- Contributed to research discussions, paper preparation, and implementation of innovative technical ideas.
